The official title of this publication is "Privacy Act Issuances, 1989 Compilation. To cite a system of records or rule in this publication, the form of citation would be:

HOW TO USE THIS COMPILATION

Identify the system you think may contain information about you and the agency that maintains those records.

Read the agency's regulations following its systems of records to determine the procedures you must follow to obtain information from that agency.

INFORMATION YOU CANNOT GET

There are limitations to the kind of information you can get. The agency may refuse to let you see information that—

—Relates to national security;

—Could reveal a confidential source; or

—Could be used to give people an unfair advantage on a government examination.

Generally, an agency's system notices (description of its systems of records) and its regulations will describe that agency's limitations on release of information.

SOME GENERAL REQUIREMENTS

How To Make a Request

In most cases you can inquire in person or by mail. It will be easier for the agency to help you, and your request will be handled more quickly, if you follow these procedures:

1. Give your full name and address, and sign your request.
2. Specify the system(s) of records you believe contain information about you.
3. Provide the relevant information required by the system you are interested in. For example, if you are inquiring about any contract you have had with the Government (loan application, contract, grant application, etc.), give the date and subject matter, and any identifying numbers that appear on documents you received.
4. Address your request to the official or person and address given in the system entry.
5. Print the words "PRIVACY ACT REQUEST" on the front of the envelope.

Proof of Identity

The agency will need some proof of your identity such as—

1. A document with your full name and address;
2. A document that has your signature and/or your photograph such as a passport, medicare card, or unemployment insurance book.
3. Any other identification specified in the system entry or regulations. If your request is by mail, you should include copies of whatever documents the agency requires to prove your identity. There is a penalty for making false statements.

Fees

The agency may charge you a fee for a copy of your records, but they may not charge you for the time and expense of locating them. The agency's rules usually state how much the fee is.

DEFENSE DEPARTMENT
UNITED STATES ARMY

HOW SYSTEMS OF RECORDS ARE ARRANGED. Department of the Army records are arranged by major functional categories. Systems of records notices are grouped similarly. For example, a system of records about assignment of military personnel may be found in the 'military personnel' functional area - the 700 series; medical treatment records are in the 'medical' functional area - the 900 series. Some subjects, such as investigations, are treated as subelements of a major function; e.g., 'military police', 'security', and 'intelligence' investigations are found in the 500 series; 'criminal' investigations in the 400 series; 'military personnel' investigations in the 700 series. 'Civilian personnel' investigations, however, are not covered by Army system notices but can be found in Civil Service Commission systems of records - in this case, under 'CSC/GOVT-4'. The following list serves as a general guide to subjects which are retrieved by personal identifier and are contained in the Army systems of record notices. To this guide have been added Civil Service Commission systems of record notices which identify records in the temporary custody of the Army and bear CSC/GOVT identification numbers.

HOW TO USE THE INDEX GUIDE. As an aid in locating a particular system of records, follow the general guide below. The series in which the subject is located will appear as numbers of the system notice identification. For example pay records for military and civilian personnel are in the 300 series; comparable system notices are A0305.08aDACA and A0306.01aDACA respectively. The first letter A represents the Army and the suffix letters are internal management accounting devices. System notices are published in numerical sequence. Following the identification number, the system notice is further identified by name, location, and the category of individuals included.

REQUESTING RECORDS

Records are retrieved by name or by some other personal identifier. It is therefore especially important for expeditious service when requesting a record that particular attention be provided to the Notification and/or Access Procedures of the particular record system involved so as to furnish the required personal identifiers, or any other pertinent personal information as may be required to locate and retrieve the record.

BLANKET ROUTINE USES

Certain blanket 'routine uses' of the records have been established that are applicable to every record system maintained within the Department of Defense unless specifically stated otherwise within a particular record system. These additional blanket routine uses of the records are published below only once in the interest of simplicity, economy and to avoid redundancy before the individual record system notices begin rather than repeating them in every individual record system.

ROUTINE USE-LAW ENFORCEMENT

In the event that a system of records maintained by this component to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, state, local, or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

ROUTINE USE-DISCLOSURE WHEN REQUESTING INFORMATION

A record from a system of records maintained by this component may be disclosed as a routine use to a Federal, state, or local agency maintaining civil, criminal, or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to a component decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant or other benefit.

ROUTINE USE-DISCLOSURE OF REQUESTED INFORMATION

A record from a system of records maintained by this component may be disclosed to a Federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

ROUTINE USE-CONGRESSIONAL INQUIRIES

ROUTINE USE-DISCLOSURES REQUIRED BY INTERNATIONAL AGREEMENTS

A record from a system of records maintained by this component may be disclosed to foreign law enforcement, security, investigatory, or administrative authorities in order to comply with requirements imposed by, or to claim rights conferred in, international agreements and arrangements including those regulating the stationing and status in foreign countries of Department of Defense military and civilian personnel.

ROUTINE USE-DISCLOSURE TO STATE AND LOCAL TAXING AUTHORITIES

Any information normally contained in IRS Form W-2 which is maintained in a record from a system of records maintained by this component may be disclosed to state and local taxing authorities with which the Secretary of the Treasury has entered into agreements pursuant to Title 5, U.S. Code, Sections 5516, 5517, 5520, and only to those state and local taxing authorities for which an employee or military member is or was subject to tax regardless of whether tax is or was withheld. Thereafter, the records are forwarded to the Washington National Records Center, Suitland, MD for permanent storage. Records of trial by special courts-martial (non-BCD) and summary courts-martial are retained in the staff judge advocate office of the general courts-martial authority for 1 year after completion of supervisory review and thereafter for 2 years in the records holding area or overseas records center. Records are then sent to the National Personnel Records Center (Military Records), St Louis, MO 63132, where they are retained for 7 years. Thereafter, the records are destroyed and the remaining evidence of conviction is the special (non-BCD) and summary courts-martial promulgating orders maintained in the individual's permanent records and any review(s) of the cases conducted pursuant to Article(s) 69 or 73, UCMJ. The original reviews of special (non-BCD) and summary courts-martial cases and a copy of all other reviews pursuant to Articles 69 or 73, UCMJ are maintained for 3 years in the office of the Chief, Examination and New Trials, US Army Judiciary, Falls Church, VA. Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Upon receipt of a valid request for an investigation, the request package is given a control number and placed in a case folder (paper record) together with identification data concerning the subject of the request for investigation and control number. The request is entered into an automated data processing system (US Army Intelligence and Security Command case control system), which is designed to provide statistical data and case control management information on the number and types of investigations that are opened, currently pending, and closed in US Army Intelligence and Security Command. This automated system triggers automatic requests upon the Defense Central Index of Investigations (DCII), a master index that holds reference to all Department of Defense investigations conducted by US Army Intelligence and Security Command and the Military Services investigative file repositories. If there are files on the subject, a request is generated by US Army Intelligence and Security Command upon the appropriate repository. Upon review of the request package and other investigative files retrieved through DCII, investigative requirements are then determined by the US Army Intelligence and Security Command Control Office and investigative leads are dispatched to the US Army Intelligence and Security Command field elements and other pertil investigative agencies. Upon receipt of the investigative leads at the field level, a duplicate investigative file is prepared by the receiving field element. This file contains investigatory report and case control material pertaining only to the specific investigative leads assigned to the controlling field element. At this point the US Army Intelligence and Security Command investigative file enters into a pending status. During this pending status, investigative reports are prepared by US Army Intelligence and Security Command field elements and sent to the control office, based upon record and interview data obtained during the investigation. Upon completion of the investigation, the closed investigative file held by the US Army Intelligence and Security Command Control Office is forwarded thru the IRR to the requestor of the investigation. Upon receipt, the requestor adjudicates the investigation and returns it to the IRR for retention. The duplicate files prepared by US Army Intelligence and Security Command field elements are destroyed 120 days after the closing.

Storage:

Paper records in file folders, rolled microfilm, and microfiche.

Retrievability:

(a) File folders are maintained in terminal digit order by regular dossier number and SSN. In order to obtain the dossier number of the subject at least one personal identifier is required. For those subjects who have no identifying data such as date of birth, military service number or SSN, the name only index is searched. Additionally, a non-standard search is required. The name only index will provide a subject's name and dossier number only. The non-standard search will provide a listing of all subjects with identifying data. In these instances, some other identifying data must be furnished such as address. Dossiers possibly identical with the subject may be forwarded to the requester.

(b) Microfiche files are maintained in duplicate copy in separate locations in Microfilm Division, IRR. The records are maintained in terminal digit order according to regular dossier number or SSN.

(c) Microfilm records are retrieved by name or dossier number.

Safeguards:

Building 4552, which houses the IRR, is under 24-hour guard and accessible only to authorized personnel. Only individuals accredited as file procurement officers may obtain and review IRR investigative records. Subordinate US Army Intelligence and Security Command elements and other official requesters are required to have General Services Administration approved containers for the storage of investigative files. Certified mail is used to forward any investigative files to official requesters of US Army Intelligence and Security Command subordinate elements.

Retention and disposal:

Personnel security investigative files may be retained for 15 years after last action reflected in the file, except that files which resulted in adverse action against the individual will be retained permanently. However, once affiliation is terminated, acquiring and adding material to the file is prohibited unless affiliation is renewed.

DEFENSE MAPPING AGENCY

HOW SYSTEMS OF RECORDS ARE ARRANGED. The Defense Mapping Agency records are grouped by subject series. Each series has records about a specific activity or function to which a subject title and number is given. Systems or records are grouped in the same way. For example, a system of records on personnel security clearances may be found in Personnel Security Files - B0504-01 and one about military personnel assignments may be found in Military Services Administrative Record Files - B0614-02. These numbers are part of the system identification (ID) which precedes the notices in the Federal Register. They look like this: B0504-01 HQ,HT,A; B0614-02 HQ,A. The letter B means Defense Mapping Agency. The first four digits (0504 and 0614) show that the records pertain to Personnel Security and Military Personnel respectively; and the last two are a further breakdown of the series. The letters that follow these numbers are internal management accounting devices only. Other systems of records which differ from these examples but have similar documents may also be found in the same series.

HOW TO USE THE INDEX GUIDE. The systems of records maintained by the Defense Mapping Agency are contained within the subject series that are listed below. This list identifies each series in the order in which it appears in this issuance. Use the list to identify subject areas of interest. Having done so, use the series number (for example 0504 for Personnel Security) to locate the systems of records grouping in which you are interested.

REQUESTING RECORDS

Records are retrieved by name or by some other personal identifier. It is therefore especially important for expeditious service when requesting a record that particular attention be provided to the Notification and/or Access Procedures of the particular record system involved so as to furnish the required personal identifiers, or any other pertinent personal information as may be required to locate and retrieve the record.

BLANKET ROUTINE USES

Certain blanket 'routine uses' of the records have been established that are applicable to every record system maintained within the Department of Defense unless specifically stated otherwise within a particular record system. These additional blanket routine uses of the records are published below only once in the interest of simplicity, economy and to avoid redundancy before the individual record system notices begin rather than repeating them in every individual record system.

ROUTINE USE-LAW ENFORCEMENT

In the event that a system of records maintained by this component to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, state, local, or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

ROUTINE USE-DISCLOSURE WHEN REQUESTING INFORMATION

A record from a system of records maintained by this component may be disclosed as a routine use to a Federal, state, or local agency maintaining civil, criminal, or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to a component decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant or other benefit.

ROUTINE USE-DISCLOSURE OF REQUESTED INFORMATION

A record from a system of records maintained by this component may be disclosed to a Federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

ROUTINE USE-CONGRESSIONAL INQUIRIES

Disclosure from a system of records maintained by this component may be made to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual.

ROUTINE USE-PRIVATE RELIEF LEGISLATION

Relevant information contained in all systems of records of the Department of Defense published on or before August 22, 1975, may be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

ROUTINE USE-DISCLOSURES REQUIRED BY INTERNATIONAL AGREEMENTS

A record from a system of records maintained by this component may be disclosed to foreign law enforcement, security, investigatory, or administrative authorities in order to comply with requirements imposed by, or to claim rights conferred in, international agreements and arrangements including those regulating the stationing and status in foreign countries of Department of Defense military and civilian personnel.

ROUTINE USE-DISCLOSURE TO STATE AND LOCAL TAXING AUTHORITIES

Any information normally contained in IRS Form W-2 which is maintained in a record from a system of records maintained by this component may be disclosed to state and local taxing authorities with which the Secretary of the Treasury has entered into agreements pursuant to Title 5, U.S. Code, Sections 5516, 5517, 5520, and only to those state and local taxing authorities for wh cr military member is or was subjects or was subject to tax regardless of whether tax is or was withheld. This routine use is in accordance with Treasury Fiscal Requirements Manual Bulletin Nr. 76-07.

ROUTINE USE - DISCLOSURE TO THE OFFICE OF PERSONNEL MANAGEMENT

A record from a system of records subject to the Privacy Act and maintained by this component may be disclosed to the Office of Personnel Management concerning information on pay and leave, benefits, retirement deductions, and any other information necessary for the Office of Personnel Management to carry out its legally authorized Government-wide personnel management functions and studies.

ROUTINE USE-DISCLOSURE TO THE DEPARTMENT OF JUSTICE FOR LITIGATION

A record from a system of records maintained by this component may be disclosed as a routine use to any component of the Department of Justice for the purpose of representing the Department of Defense, or any officer, employee or member of the Department in pending or potential litigation to which the record is pertinent.

ROUTINE USE-DISCLOSURE TO MILITARY BANKING FACILITIES OVERSEAS

Information as to current military addresses and assignments may be provided to military banking facilities who provide banking services overseas and who are reimbursed by the Government for certain checking and loan losses. For personnel separated, discharged, or retired from the Armed Forces, information as to last known residential or home of record address may be provided to the military banking facility upon certification by a banking facility officer that the facility has a returned or dishonored check negotiated by the individual or the individual has defaulted on a loan and that if restitution is not made by the individual, the U.S. Government will be liable for the losses the facility may incur.

A record from a system of records maintained by this component may be disclosed as a routine use outside the DoD or the U.S. Government for the purpose of counterintelligence activities authorized by U.S. Law or Executive Order or for the purpose of enforcing laws which protect the national security of the United States.

REQUESTING RECORDS

Records are retrieved by name or by some other personal identifier. It is therefore especially important for expeditious service when requesting a record that particular attention be provided to the Notification and/or Access Procedures of the particular record system involved so as to furnish the required personal identifiers, or any other pertinent personal information as may be required to locate and retrieve the record.

BLANKET ROUTINE USES

Certain blanket 'routine uses' of the records have been established that are applicable to every record system maintained within the Department of Defense unless specifically stated otherwise within a particular record system. These additional blanket routine uses of the records are published below only once in the interest of simplicity, economy and to avoid redundancy before the individual record system notices begin rather than repeating them in every individual record system.

ROUTINE USE-LAW ENFORCEMENT

In the event that a system of records maintained by this component to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, state, local, or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

ROUTINE USE-DISCLOSURE WHEN REQUESTING INFORMATION

A record from a system of records maintained by this component may be disclosed as a routine use to a Federal, state, or local agency maintaining civil, criminal, or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to a component decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant or other benefit.

ROUTINE USE-DISCLOSURE OF REQUESTED INFORMATION

A record from a system of records maintained by this component may be disclosed to a Federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

ROUTINE USE-CONGRESSIONAL INQUIRIES

Disclosure from a system of records maintained by this component may be made to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual.

ROUTINE USE-PRIVATE RELIEF LEGISLATION

Relevant information contained in all systems of records of the Department of Defense published on or before August 22, 1975, may be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

ROUTINE USE-DISCLOSURES REQUIRED BY INTERNATIONAL AGREEMENTS

A record from a system of records maintained by this component may be disclosed to foreign law enforcement, security, investigatory, or administrative authorities in order to comply with requirements imposed by, or to claim rights conferred in, international agreements and arrangements including those regulating the stationing and status in foreign countries of Department of Defense military and civilian personnel.

ROUTINE USE-DISCLOSURE TO STATE AND LOCAL TAXING AUTHORITIES

Any information normally contained in IRS Form W-2 which is maintained in a record from a system of records maintained by this component may be disclosed to state and local taxing authorities with which the Secretary of the Treasury has entered into agreements pursuant to Title 5, U.S. Code, Sections 5516, 5517, 5520, and only to those state and local taxing authorities for which an employee or military member is or was subject to tax regardless of whether tax is or was withheld. This routine use is in accordance with Treasury Fiscal Requirements Manual Bulletin Nr. 76-07.

ROUTINE USE - DISCLOSURE TO THE OFFICE OF PERSONNEL MANAGEMENT

A record from a system of records subject to the Privacy Act and maintained by this component may be disclosed to the Office of Personnel Management concerning information on pay and leave, benefits, retirement deductions, and any other information necessary for the Office of Personnel Management to carry out its legally authorized Government-wide personnel management functions and studies.

ROUTINE USE-DISCLOSURE TO THE DEPARTMENT OF JUSTICE FOR LITIGATION

A record from a system of records maintained by this component may be disclosed as a routine use to any component of the Department of Justice for the purpose of representing the Department of Defense, or any officer, employee or member of the Department in pending or potential litigation to which the record is pertinent.

ROUTINE USE-DISCLOSURE TO MILITARY BANKING FACILITIES OVERSEAS

Information as to current military addresses and assignments may be provided to military banking facilities who provide banking services overseas and who are reimbursed by the Government for certain checking and loan losses. For personnel separated, discharged, or retired from the Armed Forces, information as to last known residential or home of record address may be provided to the military banking facility upon certification by a banking facility officer that the facility has a returned or dishonored check negotiated by the individual or the individual has defaulted on a loan and that if restitution is not made by the individual, the U.S. Government will be liable for the losses the facility may incur.

c. Remote terminal access. Access to the terminal is controlled by the use of user identification numbers and passwords. The passwords are initially assigned by WHS/B&F; however, the user is immediately instructed to change it to something only known to him/her. Only through a complex internal checking system, can authorized WHS/B&F personnel access the password in the event it is lost or forgotten by the user. The password can be changed as frequently as desired and is now changed every 6 months or upon the departure of the employee who has knowledge of it.

UNITED STATES AIR FORCE

HOW SYSTEMS OF RECORDS ARE ARRANGED. In the Air Force, records are grouped by subject series. Each series has records about a specific activity or function to which a subject title and number is given. Systems of records are grouped in the same way. For example, a system of records on personnel security clearances may be found in 'Security - 205' and one about psychiatry in 'Medical Service - 160'. These numbers are part of the system identification (ID) which precede the notices in the Federal Register. They look like this: F20505 SPI A; F16001 SGPC A. The letter F means Air Force. The first three digits (205 and 160) show that the records pertain to Security and the Medical Service respectively; and the last two are a further breakdown of that series. The letters that follow these numbers are internal management accounting devices only. Other systems of records which differ from these examples but have similar documents may also be found in the same series.

HOW TO USE THE INDEX GUIDE. The systems of records maintained by the Air Force are contained within the subject series that are listed below. This list identifies each series in the order in which it appears in this issuance. Use the list to identify subject areas of interest. Having done so, use the series number (for example: 205 for Security) to locate the systems of records grouping in which you are interested.

System location:

Headquarters United States Air Force, Washington, DC 20330. Air Force Manpower and Personnel Center, Randolph Air Force Base, TX 78150. Air Reserve Personnel Center, Denver, CO 80280. Headquarters of major commands and separate operating agencies and Consolidated Based Personnel Offices (CBPOs), Central Civilian Personnel Offices (CCPOs), and consolidated reserve personnel offices, and activity or squadron orderly rooms. Official mailing addresses are published as an appendix to the Department of Air Force's compilation of systems or records.

Categories of individuals covered by the system:

Air Force active duty and retired military personnel. Air Force Reserve and Air National Guard personnel. Air Force Academy cadets. Air Force Civilian employees. Certain surviving dependents of deceased members of the U.S. Air Force and predecessor organizations; potential Air Force enlistees; candidates for commission enrolled in college level Air Force Reserve Officer Training Corps Programs; Deceased members of the Air Force and predecessor organizations; separated members of the U.S. Air Force, the Air National Guard (ANG) and Air Force Reserve (USAFR); ANG and USAFR Technicians; Prospective, pending, current, and former Air Force civilian employees, except Air National Guard Technicians—current and former civilian employees from other Governmental agencies that are serviced at CCPOs may be included at the option of servicing CCPO; DoD contractors and foreign military personnel on liaison or support duty.

Categories of records in the system:

The principal digital record maintained at each PDS operating level is the master personnel record, which contains the following categories of information:

1. Accession data pertaining to an individual's entry into the Air Force (place of enlistment, source of commission, home of record, date of enlistment, place from which ordered to EAD).

2. Education and training data, describing the level and type of education and training, civilian or military (academic education level, major academic specialty, professional specialty courses completed, professional military education received).

3. Utilization data used in assigning and reassigning the individual, determining skill qualifications, awarding Air Force Specialty Codes, determining duty location and job assignment, screening/selecting individual for overseas assignment, performing strength accounting processes, etc. (Primary Air Force Specialty Code, Duty and Control Air Force Specialty Code, personnel accounting symbol, duty location, up to 24 previous duty assignments, aeronautical rating, data departed last duty station, short tour return date, reserve section,

current/last duty station, short tour return date, reserve section, current/last overseas tour).

4. Evaluation data on members of the Air Force during their career (Officer Effectiveness Report dates and rating, Airman Performance Report dates and ratings, result of various qualification tests, an "Unfavorable Information" indicator, and Drug and Alcohol Abuse data).

5. Promotion data including promotion history, current grade and/or selection for promotion (current grade, date of rank and effective date; up to 10 previous grades, dates of rank and effective dates projected temporary grade, key "service dates").

6. Compensation data although PDS does not deal directly with paying Air Force members, military pay is largely predicated on personnel data maintained in PDS and provided to the Air Force Accounting and Finance Center (AFAFC) as described in ROUTINE USES below (pay date, Aviation Service Code, sex, grade, proficiency pay status).

7. Sustentation data—information dealing with programs provided or actions taken to improve the life, personal growth and morale of Air Force members (awards and decorations, marital status, number of dependents, religious denomination of member and spouse, race relations education).

8. Separation and retirements data, which identifies an individual's eligibility for and the reason for separation (date of separation, mandatory retirement date, projected or actual separation program designator and character of discharge). At the central processing site (AFMPC), other subsidiary files or processes are operated which are integral parts of PDS: (a) Procurement Management Information System (PROMIS) is an automated system designed to enable the USAF to exercise effective management and control of the procurement personnel required to meet the total scheduled manpower requirements necessary to accomplish the Air Force mission. The system provides the recruiter with job requirement data such as necessary test scores, Air Force Specialty Code, sex, date of enlistment; and the recruiter enters personal data on the applicant—SSN, name, date of birth, etc.—to reserve the job for him or her. (b) Career Airman Reenlistment Reservation System (CAREERS) is a selective reenlistment process that manages and controls the numbers by skill of first-term airmen that can enter the career force to meet established objectives for accomplishing the Air Force mission. A centralized data bank contains the actual number, by quarter, for each Air Force Specialty Code (AFSC) that can be allowed to reenlist during that period. The individual requests reenlistment by stating his eligibility (AFSC), grade, active military service time, etc. If a vacancy exists, a reservation—by name, SSN, etc.—will be made and issued to the CBPO processing the reenlistment. (c) Airman Accessions provides the process to capture a new enlistee's initial personal data (entire personnel record) to establish a personal data record and gain it to the Master Personnel File of the Air Force. The initial record data is captured through the established interface with the Processing and Classification Enlistees System (PACE) at Basic Military Training, Lackland Air Force Base, for non-prior service; for prior service enlistees the basic data (name, SSN, DOE, grade, etc.) is input directly by USAF Recruiting Service and updated and completed by the initial gaining CBPO). (d) Officer Accession is the process whereby each of the various Air Force sources of commissioning (AF Academy, AFROTC, Officer Training School, etc.) project their graduates in advance allowing management to select by skill, academic speciality, etc.—which and how many will be called to active duty when, by entering into the record an initial assignment and projected entry onto Active Duty date. On that date the individual's record is accessed to the active Master Personnel File of the Air Force. (e) Technical Training Management Information System (TRAMIS) is a system dealing with the Technical Training activities controlled by Air Training Command. The purpose of the system is to integrate the training program, quota control and student accounting into the personnel data system. TRAMIS consists of numerous files which constitute "quota banks" of available training spaces, in specific courses, projected for future use based on estimated training requirements. Files include such data as: Course Identification Numbers, Class Start and Graduation Dates, Length of Training, Weapon System Indentification, Training Priority Designators, Responsible Training Centers, Trainee Names, SSN (and other pertinent personnel data) on individuals scheduled to attend classes. (f) Training Pipeline Management Information System (TRAPMIS) is an automated quota allocating system which deals with specialized combat aircrew training and aircrew survival training. Its files constitute a "quota bank" against which training requirements are matched and satisfied and through which trainees are scheduled in "pipeline" fashion to accommodate the individual's scheduled geographical movement from school to school to end assignment. Files contain data concerning the courses monitored as well as names, SSNs and other pertinent personnel data on members being trained. (g) Air Force Institute of Technology (AFIT) Quota Bank File reflects program quotas by academic specialty for each fiscal year (current plus two futures fiscal years, plus the past fiscal year programs for historical purposes). Also, this file reflects the total number of quotas for each academic specialty. Officer assignment transactions process against the AFIT Quota Bank file to reflect the fill of AFIT Quotas. Examples of data maintained are: Academic Specialty, Program Level, Fiscal Year, Name of Incumbent selected, projected, filing AFIT Quota. (h) Job File is derived from the Authorized Record and is accessible by Position Number. Resource managers can use the Job File to validate authorizations by Position Number for assignment action and also to make job offers to individual officers. Internal suspension within the Job File occurs based upon Resource Managers update transactions. Data in the file includes: Position Number, Duty AFSC, Functional Account Code, Program Element, Location, and name of incumbent. (i) Casualty subsystem is composed of transactions which may be input at Headquarters Air Force and/or CBPOs to report death or serious illness of members from all components. A special file is maintained in the system to record information on individuals who have died. Basic identification data and unique data such as country of occurrence, date of incident, casualty group, aircraft involved in the incident and military status are recorded and maintained in this file. (j) Awards/Decorations are recorded and maintained on all component personnel in the headquarters Air Force master files. All approved decorations are input at CBPOs whereas disapproved decorations are input at MAJCOM/HAF. A decorations statistical file is built at AFMPC which reflects an aggregation of approvals/disapprovals by category of decoration. This file does not contain any individually identifiable data. All individually identifiable data on decorations is maintained in the Master Personnel File. Such information as the type of decoration, awarding authority, special order number and data of award are identified in an individual's record. Several occurrences for all decorations are stored; however only specific data on the last decoration of a particular type is maintained. (k) Point Credit Accounting and Reporting System (PCARS) is an Air National Guard/Air Force Reserve Unique supported by PDS. Its basic purpose is to maintain and account for retirement/retention points accrued as a result of participating in Drills/Training. The system stores basic personal identification data which is associated with a calendar of points, earned by participation in the Reserve program. Each year an individual's record is closed and point totals are accumulated in history, and a point earning statement is provided the individual and various records custodians. (l) Human Reliability/Personnel Reliability File is maintained at Headquarters Air Force in support of Air Force Regulation 35-99. It is not part of the Master Personnel Files but a free standing file which is updated by transactions from CBPOs. The file was established to specifically identify individuals who have become permanently disqualified under the provisions of the above regulations. A record is maintained on each disqualified individual which includes basic identification data, service component, Personnel/Human reliability status and date, and reason for disqualification. (m) Variable Incentive Pay (VIP) File for medical officers contains about 125 character records on all Air Force physicians and is specifically used to identify whether the individual is participating in the Continuation Pay or Variable Incentive Pay programs. Update to this file is provided by the Surgeon (AFMPC), the Air Force Accounting and Finance Center and directly from changes to the Master Personnel File. Besides basic identification data an individual's record, includes source of appointment, graduate medical location status, amount of VIP or Continuation Pay and the dates of authorization and the dates and reason for separation. (n) Weighted Airman Promotion System: (1) The Test Scoring and Reporting Subsystem (TSRS) provides for identifying at the CBPO individuals eligible for testing; providing output to the Base Test Control Officer and the CBPO to control, monitor, and operate WAPS testing functions; editing and scoring WAPS test answer cards at AFMPC; providing output for maintaining historical and analytical files at AFMPC and the Human Resources Laboratory (HRL) and includes the central identification of AFMPC of individuals eligible for testing. (2) The Personnel Data Reporting Subsystem (PDRS) provides for identifying promotion eligibles at AFMPC; verifying these eligibles and selected promotion data; merging test and weighted promotion data at AFMPC to effect promotion scoring, assigning the promotion objective and aligning selectees in promotion priority sequence; maintaining projections on promotion selectees at AFMPC, MAJCOM, and the CBPO, updating these projections monthly; creating output products to monitor the flow of data in the system; maintaining promotion historical and analytical files and reports at AFMPC. (3) Basically, identification data along with time in grade, test scores, decoration information, time in service, and airman performance report history is used to support this program. (o) Retired Personnel

Data System (RPDS) is made up of four files—Retired Officer Management File and Retired Airman Management File containing records on members in retired status and the Retired Officer and Airman Loss Files containing records on former retirees who have been lost from rolls, usually through death. The RPDS is used to produce address listings for the Retired Newsletter and Policy letter, statistical reports for budgeting, to manage the Advancement Program, the Temporary Disability Retired List, Age 59 rosters for ARPC, General Officer roster, and statistical digest data for management analysis functions. Data is extracted from the master files upon retirement from Active Duty or Reserves. Data includes: Name, SSN, grade data, service data, education data, retirement data and address. (p) Separated Officer File contains historical information on officers who leave the Air Force via separation, retirement, or death. Copies are sent to Human Resources Lab and Washington offices for research purposes. The data comprises the Master Personnel Record in its entirety and is captured 30 to 60 days after separation from the Air Force. (q) Airman Gain/Loss File includes data extracted from the Airman Master file when accession and separation (gains and losses) occur. This file, like the Separated Officer File, is used for historical reports regarding strength changes. Data includes name, SSN, and other data that reflects strength, i.e., promotions, reassignment data, specialty codes, etc. (r) Officer and Airman Separation Subsystem is used to process, track, approve, disapprove and project separations from the Air Force and transfers between components of the Air Force. This subsystem uses the Active, Guard, and Reserve MPFs. Data includes that specifically related to separatioins, e.g., Date of Separation, Separation Program Designator, waivers, etc. (s) The Retirements Subsystem is used to process and track applications for and approval/disapproval and projections of retirements. This subsystem uses the Master Files for Active Duty and Reserve officers and airmen. Data specifically related to retirements includes application data, date of separation, waiver codes, disapproval reason codes, Separation Program Designator, Title 10 U.S.C. section, etc. (t) Retired Orders Log is a computer produced retirement orders routine. Orders are automatically produced when approval, verification of service dates, and physical clearance have been entered in system. The orders log contains data found in administrative orders for retirement, including name, SSN, grade, order number, effective dates, etc. The log is used to control assignment of order number, and as a cross-reference between orders, revocations and amendments. (u) General Officer Subsystem of PDS contains data extracted from the Master Personnel File and language qualification data and assignment history data maintained by the Assistant for General Office Matters. A record is maintained on each general officer and general officer selectee. The general office files are updated monthly and are used to produce products used in the selection/identification of general officers for applicable assignments. (v) Officer Structure Simulation Model (OSSM) provides officer force descriptions in various formats for existing, predictive or manipulated structures. It functions as a planning tool against which policy options can be applied so as to determine the impact of such policy decisions. The (OSSM) input records contain individual identification data from the Master Personnel Record, but all output is statistical. (w) Widow's File is maintained on magnetic tape and updated by the office of primary responsibility. When required, address labels and listings are produced by employing selected PDS utility programs. The address labels are used to forward the Retired Newsletter to widows of active duty and retired personnel. The listings are used for management control of the program. Contained in the file are the name, address, and SSN of the widow. Additionally, the deceased sponsor's name, SSN, date of death, and status at time of death are maintained. (x) Historical Files are files with a retention period of 365 days or more. They consist of copies of acting master files, and are used primarily for aggregation and analysis of statistical data, althugh individual records may be accessed to meet ad hoc requirements. (y) Miscellaneous files, records, and processes are a number of work files, inactive files with a less-than-365 day retention period, intermediate records, and processes relating to statistical compilations, computer operation, quality control and problem diagnosis. Although they may contain individual-identifying data, they do so only as a function of system operation, and are not used in making decisions about people. (z) Civilian employment information including authorization for position, personnel data, suspense information; position control information; projected information and historical information; civilian education and training data; performance appraisal, ratings, evaluations of potential; civilian historical files covering job experience, training and transactions; civilian awards information, merit promotion plan work files; career programs files for such functional areas as procurement, logistics, civilian personnel, etc., civilian separation and retirement data for reports and to determine eligibility; adverse and disciplinary data for statistical analysis and employee assistance; stand-alone files, as for complaints, enrollee programs; extract files from which to produce statistical reports in hard copy, or for immediate access display on remote computer terminals; miscellaneous files, as described in item (y) above. (aa) Aviator Continuation Pay is used to identify where the officer is participating in the Continuation Pay Program. Update to this file is provided by HQ AFMPC/DPMAT, the Air Force Accounting and Finance Center, and directly from changes to the Master Personnel File. Identification data on an individual record includes amount of continuation pay, ADSC, and bonus eligibility date.

Purpose(s):

The Air Force operates a centralized personnel management system in an environment that is widely dispersed geographically and encompasses a population that is diverse in terms of qualifications, experience, military status and needs. There are three major centers of Air Force personnel management: Washington, DC, where most major policy and long-range planning/programming decision are made; the Air Force Manpower and Personnel Center at Randolph Air Force Base, TX, which performs most personnel operations-type functions for the active duty components of the force; and the Air Reserve Personnel Center at Denver, CO, which performs certain operational functions for the Reserve components of the force. Offices at Major Command Headquarters, State Adjutant Generals, and Air Force bases perform operational tasks pertaining to the population for which they are responsible. The structure of the Air Force and its personnel management system, the composition of the force, and the Air Force's stated objective of treating people as individuals, i.e., giving due consideration to their desires, needs and goals, demand a dynamic data system that is capable of supporting the varying needs of the personnel managers at each echelon and operating locations. It is to this purpose that the data in the Personnel Data System is collected, maintained, and used.

A. Uses within the Air Force personnel community, HQ USAF, Washington, DC: Deputy Chief of Staff, Personnel and his immediate staff; Director of Personnel Plans; Director of Personnel Programs; Assistant for General Officer Matters; Assistant for Colonel Assignments; Reserve Personnel Division; Air National Guard Personnel Division; and the Surgeon General, the Chief of AF Chaplains and the Staff Judge Advocate, each of which perform certain personnel functions within their area of responsibility. Data from the central data base at the AFMPC is furnished Washington area agencies by retrieval from the computer at Randolph via remote access devices and by provisions of recurring products containing required management information, including computer tape files which are used as input to unique systems with which PDS interfaces. Although most of the data is used by policy makers to develop long-term plans and programs and track progress toward established goals, some individual data is provided/retrieved to support actions taken on certain categories of persons managed by offices in the headquarters, e.g. General Officers, Colonels, Air National Guard personnel, etc. Air Force Manpower and Personnel Center (AFMPC), Randolph Air Force Base, TX. Personnel managers at AFMPC use the data in PDS to make decisions on individual actions to be taken in areas such as personnel procurement, education and training, classification, assignment, career development, evaluation, promotion, compensation, casualty and personal affairs, separation and retirement. Air Reserve Personnel Center (ARPC), Denver, CO. Personnel managers at ARPC perform many of the same functions for the Reserve components of the Air Force as the managers at AFMPC perform for the active duty force. As with the Washington area, ARPC obtains data from the central data base at AFMPC by retrieval through remote terminals and recurring output products containing information necessary to their management processes. Major Command Headquarters personnel operations are supported by the standard content of PDS records provided them by AFMPC. In addition, there is provided in the PDS record an "add-on area" which the commands are authorized to use for the storage of data which will assist them in fulfilling unique personnel management requirements generated by their mission, structure, geographical location, etc. The standard functions performed fall generally under the same classifications as those in AFMPC, e.g., assignment, classification, separation, etc. Nonstandard usages include provisions of unique aircrew data, production of speciality-tailored name listing, control of theatre oriented training, etc. Some commands use PDS data—both standard and add-on as input to unique command systems, which are separately described in the Federal Register. Consolidated Base Personnel Offices (CBPO) which represent the base-level aspect for PDS, are the prime point of system-to-people interface. Supplied with a standard data base and system, CBPOs provide personnel management support to commanders and supervisors on a daily basis. Acting on receipt of data from higher headquarters, primarily by means of transactions processed through PDS, they notify people of selection for reassignment, promotion, approval/disapproval of requests for separation and retirement, and similar personnel actions. When certain events occur to an individual at the local level, e.g., volunteer for overseas duty, reduction in grade, change in marital status, application for retirement, etc., the CBPO enters transactions into the vertical system to transmit the requisite information to other management levels and update the automated records resident at those levels. CBPOs too are allotted an "add-on" area in the computer record which they use to support local management unique requirements such as local training scheduling, unique locator listing urinalysis testing scheduling, etc.

B. Uses External to the Air Force Personnel Community: 1. Headquarters USAF/AFMPC Interfaces:

Automated interfaces exist between the PDS central site files and the following systems of other functions: a. The Flight Records Data System (FRDS) maintained by the Air Force Inspection and Safety Center (AFISC) at Norton Air Force Base, CA. (1) Certain personnel identification data on rated officers is transferred monthly to the FRDS. This data flow creates the basic identifying data in the FRDS, insures compatibility with the PDS, and precludes duplicative data collection and input generation by the AFISC. (2) Update of the personnel data to the FRDS generates return flow of flying hour data which is used at AFMPC for rated resource distribution management. b. The Master Military Pay Account (MMPA), is the Joint Uniform Military Pay System (JUMPS) centralized pay file maintained by the Air Force Accounting and Finance Center (AFAFC) at Denver, CO. The PDS transfers certain pay related data as changes occur to update the MMPA, e.g., promotions, accessions, separations/retirements, name, SSN, grade. These data provided criteria for the AFAFC to determine specific pay entitlements. c. The AFAFC maintains a separate pay system for Air National Guard and Air Force Reserve personnel called the Air Reserve Pay and Allowances System (ARPAS). (1) PDS outputs certain pay related data to ARPAS as changes occur, e.g., retirements/separations, promotions, name, SSN, grade. These data form the criteria for the AFAFC to determine specific Reserve pay entitlements. (2) ARPAS outputs data which affect accumulated point credits for Air National Guard/Reserve participation to AFMPC for update of the Point Credit Accounting and Reporting System (PCARS), a component of PDS. PCARS also receives monthly input from HQ Air University which updates point credits as a result of completing an extension Courses Institute correspondence program. d. AFAFC procies data on Variable Incentive Pay (VIP) for Medical Officers is used to update a special control file within PDS and produce necessary reports for management of the VIP program. e. Air Training Command operates a system called PACE (Processing and Classification of Enlistees) at Lackland Air Force Base, TX. From the system data is fed to AFMPC to initially established the PDS record on an Air Force enlistee. f. On a monthly basis, copies of the PDS master Personnel File are provided to the Human Resources Laboratory at Brooks Air Force Base, TX, where they are used as a statistical data base for research purposes. g. On a quarterly basis, AFMPC provides the USAF School of Aerospace Medicine with data concerning name, SSN, and changes in base and command of assignment of flying personnel. The data reflects significant medical problems in the flying population. h. A complete printout of PDS data pertaining to an individual is included in his Master Personnel Record when it is forwarded to National Personnel Records Center. i. PDS data is provided to the Congingency Planning Support Capability (CPSC) at six major command headquarters: Tactical Air Command, Strategic Air Command, Military Airlift Command, Air Force Communications Command, United States Air Forces, Europe, and Pacific Air Forces. A record identifiable by individual's name and SSN provides contingency and/or manning assistance temporary duty (TDY) being performed by the individual. Record is destroyed upon completion of the TDY. Statistical records (gross statistics by skill and unit) are also generated for CPSC from PDS providing force availability estimates. CPSC is described separately in the Federal Register.

2. Base Level CBPO Interfaces: Certain interfaces have been established at base level to pass data from one functional system to another. The particular mode of interface depends on the needs of the receiving function and the capabilities of the system to produce the necessary data: a. The Flight Management Data System (FMDS) receives an automated flow of selected personal data on flying personnel as changes occur. This data consists primarily of assignment data and service dates which the base flight manager uses to determine appropriate category of aviation duty which is reflected by designation of an Aviation Service Code. The FMDS outputs aviation service data as changes occur to the BLMPS. These data subsequently flow to the PDS central site files at AFMPC so it is available for resource management decisions. b. The Medical Administration Management System (MAMS), currently being developed and tested, will receive flow of selected assignment data as changes occur for personnel assigned to medical activities. MAMS will use these data to align assigned personnel with various cost accounting work centers within the medical activity and thus be able to track manpower expenditure by subactivities. c. The Automated Vehicle Operator Record (AVOR) is being developed to support motor vehicle operator management. Approximately 115 characters of vehicle operator data will be incorporated into the BLMPS data base during FY76 for both military and civilian personnel authorized to operate government motor vehicles and selected personnel data items (basic identification data) will be authorized for access by the vehicle operator managers. d. Monthly, a magnetic tape is extracted from BLMPS containing selected assignment data on all assigned personnel. This tape is transferred to the basic Accounting and Finance Office for input into the Accounting Operations System. This system uses these data to derive aggregate base manpower cost data. e. A procedure is designed into BLMPS to output selected background data in predefined printed format for personnel being administered militiary justice. This output is initiated upon notification by the base legal office. The data is forwarded to the major command where it is input into the Automated Military Justice Analysis and Management System (AMJAMS). f. The BLMPS output (on an event-oriented basis) pay-affecting transactions such as certain promotions, accessions, and assignments/reassignments, to AFAFC, where the data is entered into the JUMPS. C. Uses External to the Air Force, the Office of the Secretary of Defense (OSD): 1. Individual information is provided to offices in OSD on a recurring basis to support top-level management requirements within the Department of Defense. Examples are the DoD Recruiter File to the Assistant Secretary for Manpower and Reserve Affairs (M&RA), a magnetic tape extract of military personnel record (RCS: DD-M (SA) 1221) to M&RA, input to the Reserve Component Common Personnel Data System to M&RA and the Post Career Data File to M&RA. 2. To Other Defense Agencies: PDS supports other components of DoD by provision of individual data in support of programs operated by those agencies. Examples are the Selected Officer List to Defense Intelligence Agency for use in monitoring a classified training program and the Defense System Management School (DSMS) Track Record System to DSMS for use in evaluating the performance of graduates of that institution. An Extract file on Air National Guard Technicians is provided the National Guard Computer Center. 3. Other Government/Quasi-Government Agencies: Information used in analyzing officer/airman retention is provided RAND Corporation. Data on prior service personnel with military service obligations is forwarded to the National Security Agency. Lists of officers selected for promotion and/or appointment in the Regular Air Force are sent to the Office of the President and/or appointment in the Regular Air Force are sent to the Office of the President and/or the Congress of the United States for review and confirmation. Certain other personnel information is provided these and other government agencies upon request when such data is required in the performance of official duties. Selected personnel data is provided foreign governments U.S. governmental agencies, and other Uniformed Services on USAF personnel assigned or attached to them for duty. Examples: the government of Canada, Federal Aviation Administration, U.S. Army, Navy, etc. 4. Litigation 5. Miscellaneous. Lists of individuals selected for promotion or appointment, who are being reassigned, who die, or who are retiring are provided to unofficial publications such as the Air Force Times, along with other information of interest to the general Air Force public. Information from PDS support a world-wide locator system which responds to queries as to the location of individuals in the Air Force. Locator information pertinent to personnel on active duty may be furnished to a recognized welfare agency such as the American Red Cross or the Air Force Aid Society. For civilian personnel—to provide automated system support to Air Force officials at all levels from that part of the Office of Personnel Management required personnel management and records keeping system that pertains to evaluation, authorization and position control, position management, staffing skills inventory, career management, training, retirement, employee services, rights and benefits, merit promotion, demotions, reductions in force, complaints resolution, labor mangement relations, and the suspensions and processing of personnel actions; to provide for transmission of such records between employing activities within the Department of Defense—to provide individual records and reports to OPM; to provide information required by OPM for the transfer between federal activities; to provide reports of military reserve status to other armed services for contingency planning—to obtain statistical data on the work force to fulfill internal and external report requirements and to provide Air Force offices with information needed to plan for and evaluate manpower, budget and civilian personnel programs—to provide minority group designator codes to the Office of Personnel Management's automated data file—to provide the Office of the Assistant Secretary of Defense Manpower and Reserve Affairs with data to access the effectiveness of the program for employment of women in executive level positions—to obtain listings of employees by function or area for locator and inventory purposes by Air Force offices—to assess the effect or probable impact of personnel program changes by simulation and modeling exercises—to obtain employee duty locations and other employee data for personnel program management purposes—to obtain employee duty locations and other information releasable under OPM rules and the Freedom of Information Act to respond to request from Air Force offices, other Federal agencies and the public—to provide individual records to other components of the Department of Defense in the conduct of their official personnel management program responsibilities—to provide records to OPM for files reconciliation and maintenance purposes—and to provide information to employee unions as required by negotiated contracts.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

The "Blanket Routines Uses" that appear at the beginning of the Department of the Air Force's compilation of systems of records apply to this system.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Maintained in visible file binders/cabinets, card files, on computer magnetic tapes, disks or computer paper printouts or microfiche.

Retrievability:

Filed by name or Social Security Number (SSN). The primary individual record identifier in PDS is SSN. Some files are sequenced and retrieved by other identifiers; for instance, the assignment action record is identified by an assignment action number. Additionally, at each echelon there exists computer programs to permit extraction of data from the system by constructing an inquiry containing parameters against which to match and select records. As an example, an inquiry can be written to select all Captains who are F-15 pilots, married, stationed at Randolph AFB, who possess a master's degree in Business Administration; then display name, SSN, number of dependents and duty location. This is the added capability of selecting an individual's record or certain pre-formatted information by SSN on an immediate basis using a teletype or cathode ray tube display device. High-speed line printers located in the Washington, DC, area, at Major Command and at ARPC permit the transfer of volume products to and for the use of personnel managers at those locations.

Safeguards:

Records are accessed by custodian of the record system and by person(s) responsible for servicing the record system in the performance of their official duties where authorized, and properly screened and cleared for need-to-know, and by commanders of medical centers and hospitals. Records are stored in security file containers/cabinets, safes, vaults and locked cabinets, or rooms. Records are protected by guards. Records are controlled by personnel screening visitor registers and computer system software.

Retention and disposal:

Retained in office files until superseded, obsolete, no longer needed for reference, or on inactivation, then destroyed by tearing into pieces, shredding, pulping, macerating, or burning. Preceding retention statement applies to Analog output products of the Personnel Data System. Data stored digitally within system is retained only for the period required to satisfy recurring processing requirements and/or historical requirements. Files with a retention period of 364 days or less are automatically released at the end of their specified retention period. "Permanent history" files are retained for 10 years. Files 365 or more days old are defined as "historical files" and are not automatically released. Retention periods for categories of PDS files are as follows: If cycle in which a program or series of programs creating output is daily, and the created magnetic tape file will be used for processing of next daily, then the retention will be not greater than 10 days. If cycle in which a program or series of programs creating output is daily, and the created magnetic tape file will be used for processing of next daily, which is also used for processing of weekly runs, then the retention will be not greater than 20 days. If cycle in which a program or series of programs creating output is daily, and the created magnetic tape file will be used for processing of next weekly, then the retention will not be greater than 20 days. If cycle in which a program or series of programs creating output is daily, and the created magnetic tape file will be used for processing of next weekly, which is also used for processing of monthly runs, then the retention will be not greater than 30 days. If cycle in which a program or series of programs creating output is weekly, and the created magnetic tape file will be used for processing of next weekly, then the retention will be not greater than 20 days. If cycle in which a program or series of programs creating output is weekly, and the created magnetic tape file will be used for processing of next weekly, which is also used for processing of monthly runs, then the retention will be not greater than 30 days. If cycle in which a program or series of programs creating output is monthly, and the created magnetic tape file will be used for processing of next monthly, then the retention will be not greater than 30 days. If cycle in which a program or series of programs creating output is monthly, and the created magnetic tape file will be used for processing of next monthly, which is also used for processing of quarterly runs, then the retention will be not greater than 90 days. If cycle in which a program or series of programs creating output is monthly, and the created magnetic tape file will be used for processing of next monthly, which is also used for processing of semi-annual run, the retention will be not greater than 190 days. If cycle in which a program or series of programs creating output is monthly, which is also used for processing of annual runs, then the retention will be not greater than 365 days. If cycle in which a program or series of programs creating output is monthly, and the created magnetic tape file will be used for processing of next monthly, which is also used for processing of permanent history, then the retention will be not greater than 999 days. If cycle in which has program or series of programs creating output is quarterly, and the created magnetic tape file will be used for processing of next quarterly, then the retention will be not greater than 90 days. If cycle in which program or series of programs creating output is quarterly, and the created magnetic tape file will be used for processing of next quarterly, which is also used for processing of semi-annual run, then the retention will be not greater than 190 days. If cycle in which a program or series of programs creating output is quarterly, and the created magnetic tape file will be used for processing of next quarterly, which is also used for processing of annual runs, then the retention will be not greater than 365 days. If cycle in which a program or series of programs creating output is quarterly, and the created magnetic tape file will be used for processing of next quarterly, which is also used for processing of permanent history, then the retention will be not greater than 999 days. If cycle in which a program or series of programs creating output is semi-annual, and the created magnetic tape file will be used for processing of next semi-annual, then the retention will be not greater than 190 days. If cycle in which a program or series of programs creating output is semi-annual, and the created magnetic tape file will be used for processing of next semi-annual, which is also used for processing of annual runs, then the retention will be not greater than 365 days. If created magnetic tape file will be used for processing of permanent history, then the retention will be not greater than 999 days. If cycle in which a program or series of programs creating output is annual, and the created magnetic tape file will be used for processing of next annual, then the retention will be not greater than 365 days. If cycle in which a program or series of programs creating output is annual, and the created magnetic tape file will be used for processing of next annual, which is also used for processing of permanent history, then the retention will be not greater than 999 days. If the program or series of programs creating output is a one time run, and the file will be used for processing as required, then the retention will be lowest possible retention commensurate to job completion. If the program or series of programs creating output is compile card image or SOLT tapes, and the created magnetic tape file will be used for processing as required run, then the retention will be not greater than 90 days maximum. If cycle in which a program or series of programs creating output is as required runs, and the created magnetic tape file will be used for processing as required, the retention will be lowest possible commensurate to job completion. If the program or series of programs creating output is test files, and the created magnetic tape file will be used for processing as required, then the retention will be not greater than 30 days. If the program or series of programs creating output is print/punch backup and the created magnetic tape file will be used for processing as required, ther the retention will be not greater than 10 days. In addition, for civilian personnel at base level (CCPO), master personnel files for prospective employees are tranferred to the action file upon appointment of the employee or in the event the employee is not appointed and will no longer be considered a candidate for appointment, are destroyed by degaussing-master personnel files for active employees are transferred to the separated employee history file where they are retained for three years subsequent to separation and then destroyed by degaussing. The notification of personnel action—Standard Form 50—is disposed of as directed by OPM—work files are records such as the employee career brief, position survey work sheet, retention register work sheet, alphabetic and Social Security Number locator files, and personnel and position control register are destroyed after use by tearing into pieces, shredding, pulping, macerating, or burning—work sheets pertaining to qualification and retention registers are disposed of as directed by OPM—transitory files such as pending files, and recovery files are destroyed after use by degaussing—files and records retrieved through general retrieval systems are destroyed after use by tearing into pieces, shredding, pulping, macerating, or burning. Those records at AF Manpower and Personnel Center for the end of each fiscal year quarter are retained for five years before destroying by deletion—the separated employee file retains employee information at time of separation for five years after which the employee's record is destroyed by degaussing.
